

The world's #1 manufacturer for Ford
aftermarket parts since 1988.

Speed Matters

**Steeda Maverick Premium Passenger Side Oil Separator
(2025-2026)
MPN: 555-3736**

Install Time: 30 min

Difficulty: Five blue icons representing the difficulty level, each a stylized 'S' shape.

Parts List - 555-3734

Description	Quantity
LONG HOSE	1
SHORT HOSE	1
CATCH CAN WITH FILTER ASSEMBLY	1
CATCH CAN BRACKET	1
BUTTON HEAD BOLTS	2
6mm WASHER	2
ZIPTIE	2

Tools List

- 10mm Socket
- 13/16 Standard Wrench
- 6mm Allen key

Catch Can Assembly

Step 1

Attach the hose routed from the valve cover to the same side port as the filter to maximize oil collection efficiency as seen in figure 2. Do not fully tighten the hose fittings at this stage; leave them slightly loose to allow rotational adjustment during final positioning.

Step 2

With both hoses installed, orient the mounting bracket in the opposite direction of the straight bung to ensure optimal clearance and fitment. Secure the mounting bracket using the supplied bolts and washers, tightening them until secure. After the assembly is complete, tighten the locknut with a wrench to prevent rotational movement of the hoses and ensure a fixed, stable orientation.

Removal of the Factory PCV Hose

Step 3

Remove the stock PCV hose from the valve cover and the intake bung highlighted in figure 5. Remove the 10mm bolt as seen in Figure 6 to mount the catch can bracket off of.

 NOTE: If the stock PCV hose is stuck, do not force it off but push in before pulling off.

Installation of Catch Can

Step 4

Place the catch can with the bracket attached between the tab off the body of the car and the windshield wash reservoir and loosely tighten the 10mm bolt. Connect the longer hose onto the Intake bung, and connect the shorter hose to the valve cover. Fully secure the 10 mm bolt down for the catch can when all hoses are fully connected. Use provided zip ties to secure hoses.
